ARM FOR POT HAULING

Pot hauler at a reasonable price

The Pot hauler arm type RSHTLKB03 is suitable for pot fishing for lobster, crab and eel. It fits Power blocks type KB02ER and KB03ER, and can easily be mounted with only two screws. The arm is made of sea water resistant aluminium and is supplied with guide rollers and a knife. The knife is fitted for the tow rope sheaves and will lead the rope out of the sheaves and prevent the rope from jamming. A spacer will adapt the pot hauler arm to power blocks with 300mm roller. The Pot hauler makes the pot hauling season more effective and safe.
